

Hi we're HACKEDERS

DYNAMIC TRAFFIC MANAGEMENT

Check the next slide to learn more

Picture this:

Imagine being stuck in traffic lights during rush hour while there are absolutely no vehicles at the lane with green light.

Computer Vision

Computer vision is a interdisciplinary scientific field that deals with how computer can gain high level understanding from digital images or video

Computer Vision

Computer vision

OpenCV is an open source library for the computer vision. It provides the facility to the machine to recognize the faces or objects. In this tutorial we will learn the concept of OpenCV using the python programming language

open cv

YOLO algorithm based on regression instead of selecting interesting part of an image. It predict classes and bounding boxes for the whole image in one run of the algorithm.

YOLO Algorithm

**Thank you,
everyone. It
was nice to
meet you all.**
